

Ultramol® K Plus Acid – Polonia

Related Crops

- Contains potassium nitrate, the most quick and completely uptakeable K and N source.
- Combatting soil salinity. Leaving no excess of chloride or sulphate. Antagonistic nitrate-chloride uptake diminishes the uptake of chloride (Cl^-).
- Facilitates the uptake of other essential nutrients like potassium (K^+), calcium (Ca^{++}) and magnesium (Mg^{++}).
- Facilitates mass flow uptake through less salinity build-up.
- Containing the only strong dry acid Ultramol® Magnum P44®.
- Prevents clogging and cleaning of fertigation systems.

Technical information

Nitrate nitrogen (N-NO₃):	min. 13,9 %
Potassium oxide (K₂O):	min. 45,0 %
Solubility (g/l at 20°C):	316
Insoluble substances:	<0,005 %
EC (1 g/l w 25°C, w mS/cm):	1,3
pH (at 1% concentration):	3,1
Color:	White
