

Ultrasol[®]ine K Plus – Middle East

Related Crops

The latest revolution in plant performance:

Science shows that plants need iodine

The application of **Ultrasol[®]ine K Plus** conveniently and adequately ensures the iodine supply to fertigated crops in order to maximize crop yield and quality and improves plant resilience to environmental stress.

- Improved root growth optimal nitrogen metabolism
- Improved canopy development and branching
- Optimal photosynthesis
- Improved tolerance to oxidative stress
- Improved flowering and fruit quality
- Improved calcium concentration in the fruit and better shelf life

Technical information

Nitric nitrogen (N-NO₃):	13,7 % min
Potassium oxide (K₂O):	46,3 % min
Solubility (g/l at 20°C):	316
Insolubles:	< 0,02 %
EC (1 g/l at 25°C, in mS/cm):	1,3
Color:	White
