

Ultrasol® K Plus - Southeast Asia

Related Crops

- •Ultrasol® K Plus potassium nitrate is derived from a natural and environmental friendly production process, and contains traces of beneficial nutrients.
- •Ultrasol® K Plus has one of the highest chemical purity on the market, with a formula of 13.7-0-38.4. This purity brings more nutrients per applied unit of Potassium Nitrate.
- •Ultrasol® K Plus is the most efficient water-soluble K-source for fertigation.
- •Ultrasol® K Plus is the ideal potassium source to grow outstanding crops with directly available nitrogen in the form of nitrate.
- •Free flowing, fine, crystalline powder which quickly dissolves in water. Poor in chloride and mixable with all water-soluble nutrient sources.

Technical information

Nitric nitrogen (NO3-):

Potassium oxide (K2O):

Solubility (g/l at 20°C):

Insolubles:
