

Qrop® mix Kali Chili

Related Crops

- Qrop® Mix Kali Chili is a granulated fertilizer with a N:K ratio of 1:1. Nitrogen is 100% nitric, which promotes the absorption of other cations such as potassium, calcium, and magnesium.

- Qrop® Mix KaliChili is ideal for acidic and slightly acidic pH soils, and can be applied on the soil surface with no need for digging, as it does not contain or generate ammonia and it is not volatile, which allows for maximum efficiency in nitrogen application.

Technical information

Nitrogen (N-NO3):	15%
Potassium Oxide (K2O):	15.3%
Density (Tm/m3):	1.2
