

Speedfol® Cereal SP – Southeast Asia

Related Crops

- Speedfol® Cereal SP can be applied for all types of cereals such as rice, wheat, barley, maize, triticale, oat, barley, sorghum and millet.
- Foliar application with Speedfol® Cereal SP is the perfect tool to boost your cereals to high yields. It strengthens your crops and makes your cereals less susceptible to abiotic and biotic stress. It also revitalizes your plants during and after periods of stress such as unfavorable weather conditions.
- Applications will increase your grains with higher grain yields and better quality. They will also reduce grain losses due to disease and lodging.
