

Ultrazol® MAP

Related Crops

- Is a nitrogen (N) and phosphorus (P) source, high in phosphorus.
- Phosphorus is essential for root development and crop establishment.
- Ultrazol® MAP has the ability to buffer fertigation solutions keeping the pH at around 4,5 for optimal root uptake.
- Can be mixed with all water-soluble fertilizers other than calcium containing fertilizers.

Technical information

Ammonium nitrogen (N-NH₄):	12%
Phosphorous pentoxide (P₂O₅):	61%
Solubility (g/l at 20°C):	380
Insolubles:	<0.1%
EC (mS/cm at 25°C):	0.8
pH (1%):	4.5
