

Ultrasol® SOP

Related Crops

- A fully water-soluble crystalline potassium (K) and sulphur (S) source.
- Applied in fertigation of soil-grown crops during maturation phase, supplying part of the potassium without nitrogen.
- In hydroponic systems Ultrasol® SOP is applied in the first place as sulphate source for crops that require high amounts of sulphur.

Technical information

Potassium oxide (K₂O):	51.5%
Sulphur (S):	18.7%
Solubility (g/l at 20°C):	124
Insolubles:	<0.05%
EC (mS/cm at 25°C):	1.5
pH (1%):	2.4
