Ultrasol® micro Rexene® FeD12

Related Crops

•Ultrasol® micro Rexene® FeD12 is a stable, water-soluble iron-DTPA chelate, developed for high performance in hydroponic systems, but also suitable for soil and foliar applications.

•Fe-DTPA products have a higher pH stability than EDTA products, which make them a preferred source in hydroponic systems.

•Typical Fe content is 11.6%, fully DTPA chelated.

•pH stability 1.5-7.5.
