

## Ultrasol® Magnum Special 12-2-33+TE

### Related Crops

- This formula is especially designed for the final phase in the plant's life cycle : the maturation of the reproductive organs (fruit, seed, tuber) in order to obtain more caliber, quality and weight.
- About 80% of the nitrogen is under nitrate nitrogen form. A high nitrate nitrogen level acts synergistic in the uptake of potassium.
- Frequently used when the irrigation water is saline with high levels of chloride. High nitrate levels are applied in the nutrient solution to counteract the negative effects of chloride excess imbalances.
