

Speedfol® Rexene® FeE13 SP

Related Crops

- Speedfol® Rexene® FeE13 SP is a product developed for iron deficient crops through foliar application. Foliar application is recommended when the soil is neutral to alkaline or when soil application is impossible for other reasons.
- 13 stands for the effective amount of iron of 13,1%, fully EDTA chelated.
- SP stands for Soluble Powder, with a solubility of 90 g/l (20°C).
- pH stability 1,5-6,5.
- EDTA chelation protects for losses through precipitations during tank mix preparations.
