

Ultrazol® Magsul

Related Crops

- A sulphur (S) and magnesium (Mg) source, used in fertigation schemes to cover the plant's need of these secondary macronutrients.
- S contributes to the formation of certain essential amino acids and proteins, while Mg is a key component of chlorophyll improving energy uptake and carbohydrate formation.
- Ultrazol® Magsul can be mixed with all water-soluble fertilizers other than calcium containing components.

Technical information

| | |
|---|-------|
| Magnesium oxide (MgO): | 16,2% |
| Sulphur trioxide (SO₃): | 33,0% |
| Solubility (g/l at 20°C): | 710 |
| EC (1 g/l at 25°C, in mS/cm): | 1,2 |
| pH (1%): | 8,0 |
