

Ultramol® micro Rexene® FeQ48

Related Crops

- Ultramol® micro Rexene® FeQ48 is a stable, water-soluble and non-dusting iron EDDHA chelate.
- Contains typically 6,0% Fe, of which 4,8% is EDDHA chelated by the ortho-ortho isomer as the most effective isomer in terms of binding strength.
- Developed for the correction and prevention of iron deficiency in a wide range of agricultural and horticultural crops, particularly in alkaline and calcareous soils.
- Stable within pH 3,5-12.

Solubility in water 50 g/l (for practical use).
