

Ultrasol® micro Rexene® FeQ32

Related Crops

- Ultrasol® micro Rexene® FeQ32 is a stable, water-soluble and non-dusting iron EDDHA chelate.

- Contains typically 6% Fe, of which 3,2% is EDDHA chelated by the ortho-ortho isomer as the most effective isomer in terms of binding strength.

- Developed for the correction and prevention of iron deficiency in a wide range of agricultural and horticultural crops, particularly in alkaline and calcareous soils.
