

Speedfol® Oilseed SP

Related Crops

- Speedfol® Oilseed SP is designed for application on oilseed crops like sunflower, rapeseed, soybean, olive, mustard, flax, canola.
- Speedfol® Oilseed SP contains an elevated level of boron (B). Boron plays an essential role in pollination, fecundation, fruit initiation, fruit set and fruit retention. Potassium is essential for carbohydrate production and transport from the leaves to the seed and fruits, which translates into higher yield levels.
- Speedfol® Oilseed SP sprays are recommended to overcome specific nutrient deficiencies, which will ultimately lead to improved fruit set, yield and oil content of seeds and fruits.
