

Ultrasol® SOP

Related Crops

- A fully water-soluble crystalline potassium (K) and sulfur (S) source.
- Applied in fertigation of soil-grown crops during maturation phase, supplying part of the potassium without nitrogen.
- In hydroponic systems Ultrasol® SOP is applied in the first place as sulfate source for crops that require high amounts of sulfur.
- Ultrasol® SOP has an acidic pH, helping to prevent blockage of nozzles and drip lines of irrigation systems.

Technical information

Potassium oxide (K₂O):	51,5 %
Sulphur (SO₃):	18,7 %
Max. solubility (g/l at 20°C):	124
Insolubles:	< 0,05 %
EC (mS/cm at 25°C):	1,5
pH (1%):	2,4
