

Ultramol® micro Rexene® Cu15

Related Crops

- Ultramol® micro Rexene® Cu15 is a stable, water-soluble and non-dusting copper-EDTA chelate, meant for application to plants after diluting with water.
- Developed for usage against copper deficiency and can be applied by foliar feeding or by soil application and in hydroponic systems.
- Typical content of copper (Cu) is 15,0%, fully chelated.
- pH stability 1,5-10.
- Solubility in water 1200 g/l (for practical use).
