

Ultrasol® micro Rexene® Zn15

Related Crops

- Ultrasol® micro Rexene® Zn15 is a stable, water-soluble and non-dusting zinc EDTA chelate.
- Developed for usage against zinc deficiency soils and can be applied by foliar feeding or by soil application and in hydroponic systems.
- Typical content of zinc (Zn) is 15,0%, fully chelated.
- pH stability 2-10.
- Solubility in water 1200 g/l (for practical use).
