

Ultrasol® Magnit

Related Crops

- A nitrogen (N) and magnesium (Mg) source, free of sulfur, limiting the oversupply of sulfate in fertigation programs.
- Ultrasol® Magnit contains nitric nitrogen, the most efficient nitrogen source for plants that acts synergistically on the uptake of magnesium and other cations.

Technical information

Nitric nitrogen (N-NO₃):	10,7 %
Magnesium oxide (MgO):	15,5 %
Solubility (g/l at 20°C):	2.250
Insolubles:	< 0,01 %
EC (mS/cm at 25°C):	0,88
pH (1%):	6,5
