

Speedfol® Pecan SP

Related Crops

Speedfol® Pecan SP is a soluble powder formulated specifically for the nutritional requirements of pecan in foliar applications. All nutrients are immediately available when dissolved into solution to allow precise and timely application, increasing nut retention, nut size and meat yield percentage. A foliar application program of Speedfol® Pecan SP will maintain optimum leaf nitrogen, potassium, boron and zinc levels, helping growers reach their goals of increasing the yield and quality of their pecans, thus obtaining premium pricing for their crop year after year.

Technical information

Element:	%
Total nitrogen (N):	10
Nitrate nitrogen:	10
Soluble potash (K₂O):	34
Boron (B):	0.7
Zinc (Zn):	7
