

## Ultrasol® K Plus – Southeast Asia

### Related Crops

- Ultrasol® K Plus potassium nitrate is derived from a natural and environmental friendly production process, and contains traces of beneficial nutrients.
- Ultrasol® K Plus has one of the highest chemical purity on the market, with a formula of 13.7-0-38.4. This purity brings more nutrients per applied unit of Potassium Nitrate.
- Ultrasol® K Plus is the most efficient water-soluble K-source for fertigation.
- Ultrasol® K Plus is the ideal potassium source to grow outstanding crops with directly available nitrogen in the form of nitrate.
- Free flowing, fine, crystalline powder which quickly dissolves in water. Poor in chloride and mixable with all water-soluble nutrient sources.

### Technical information

<b>Nitric nitrogen (NO<sub>3</sub>-):</b>	13.7% min.
<b>Potassium oxide (K<sub>2</sub>O):</b>	46.3% min.
<b>Solubility (g/l at 20°C):</b>	316
<b>Insolubles:</b>	<0.02%
<b>EC (mS/cm at 25°C):</b>	1.35
<b>Color:</b>	White
