

Speedfol® Rexene® Mn13 SP

Related Crops

- Speedfol® Rexene® Mn13 SP is a product developed for manganese deficient crops through foliar application. Foliar application is recommended when the soil is highly alkaline or when soil application is impossible for other reasons.
- Speedfol® Rexene® Mn13 SP contains 128 grams manganese per kg of product as Mn-disodium-EDTA derived from ethylenediaminetetraacetic acid.
- SP stands for soluble powder, with a solubility of 800 g/l (20°C).
- pH stability 3-10.
- EDTA-chelation prevents losses through precipitations in the spray tank mix.
