

## Speedfol® High N SP

### *Related Crops*

- Speedfol® High N SP is an excellent source of quickly absorbable nitrogen (N) through foliar application, containing a mix of nitric, ammoniacal and ureic nitrogen.
- A significant magnesium content will stimulate the formation of chlorophyll and will increase the energy level of the crop through improved photosynthesis.
- Is also a source of 6 micronutrients, contributing to the prevention of correction of micronutrient deficiencies and stimulating the metabolism of Nitrogen.
