

Ultrasol® MAP

Related Crops

- Is a nitrogen (N) and phosphorus (P) source, high in phosphorus.
- Phosphorus is essential for root development and crop establishment.
- Ultrasol® MAP has the ability to buffer fertigation solutions keeping the pH at around 4,5 for optimal root uptake.
- Can be mixed with all water-soluble fertilizers other than calcium containing fertilizers.

Technical information

Ammonium nitrogen (N-NH₄):	12 %
Phosphorus pentoxide (P₂O₅):	61 %
Solubility (g/l at 20°C):	380
Insolubles:	< 0,1 %
EC (mS/cm at 25°C):	0,8
pH (1%):	4,5
