

Ultrasol® Magnum Flex Multipurpose 16-22-23

Related Crops

Multipurpose:

- Ultrasol® Magnum Flex Multipurpose is a multipurpose formula with $N:P_2O_5:K_2O = 2:3:3$ ratio.
- The formula can be used in fertigation, pivot applications or for foliar applications in any stage of plant growth and development and can be used to correct nutritional deficiencies when it is difficult to identify the cause of the deficiency.
- The total nitrogen content is divided into 7% N – nitrate, and 9% N – urea. The presence of urea facilitates the penetration and uptake of the other nutrients by the leaf, when applied as a foliar spray.
- Because Ultrasol® Magnum Flex Multipurpose is a strong acidifier, it is highly recommended that the pH of the final tank mix is checked before application starts, as pH levels below 4 may provoke scorching.

Technical information

Total nitrogen (N):	16,0%
Phosphorus pentoxide (P2O5):	22,0%
Potassium oxide (K2O):	23,0%
EC (1 g/l at 25°C, in mS/cm):	1,29
